Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1- 9, 11, and 12 (9,11)are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Application Publication number 2001/0021336. It is noted that this prior art represents the previous work of one of the inventors of the instant application.

See paragraph 28: the use of dry stripping gas creates the guiding layer medium as claimed.

With regards to claim 6: the hollow pipe is 425, it is clear that the dry layer is created by installing the hollow pipe, since the hollow pipe is required to inject dry gas.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 10 and 12 (10) are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Application Publication number 2001/0021336.

The '336 application lacks disclosure of sand or gravel. Official Notice is taken of the fact that sand and gravel are commonly found in the ground where pollutants are also found, and therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to have practiced the process of the '336 document in an area with sand and/or gravel.

Response to Arguments

3. Applicant's arguments filed 4/15/09 have been fully considered but they are not persuasive. Applicant alleges that the '336 publication do not create a medium with lower resistance. This is not persuasive---see paragraph 28:

"As a result of the introduction of dry stripping gas the soil will dry out and its porosity will increase so that the resistance against the stripping gas flowing through it decreases"

The '336 publication clearly contemplates creating a medium with lower resistance.
